DESJARDINS SECURITIES INTERNATIONAL INC.

Notes to the Financial Statements

December 31, 2017 and 2016

(stated in U.S. dollars)

1. Description of Business

Desjardins Securities International Inc. (the Company), was incorporated on January 24, 2001 under the *Canada Business Corporations Act*. The Company is a member of the *Financial Industry Regulatory Authority* (FINRA) and *US Securities and Exchange Commission* (SEC), and operates pursuant to SEC Rule 15c3-3(k)(2)(ii) as an introducing broker-dealer, clearing all transactions on a fully disclosed basis through its clearing firm, Pershing LLC. Desjardins Securities International Inc. does not hold customer funds or safe keep customer securities.

The Company is a wholly-owned subsidiary of Desjardins Securities Inc., which is under the ultimate control of the Federation des caisses Desjardins du Quebec (the Federation). The Company's head office is located at 1170 Peel Street, Suite 300, Montreal, Quebec, Canada, H3B 0A9.

2. Significant Accounting Policies

These Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States ("US GAAP").

a) Use of Estimates

The preparation of the Financial Statements in accordance with US GAAP requires management to make estimates and assumptions which affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent assets and liabilities at the reporting date. These estimates are based on judgment and the best available information at the time. Therefore, actual results may differ from these estimates. There were no significant estimates during 2017 and 2016.

b) Transactions

Transactions and related revenues and expenses are recorded on a trade date basis.

c) Financial Instruments

The Company classifies its financial assets in the category "Loans and receivables". Financial liabilities are classified in the category "Other".

All financial assets and liabilities are initially recognized at fair value. The fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

After the initial recognition, financial assets and liabilities are subsequently carried at amortized cost under the effective interest rate method. The carrying value of these financial assets and liabilities approximates their fair value.

d) Cash and Cash Equivalents

"Cash and cash equivalents" consist of cash and short-term U.S. Treasury Bills.

e) Accounts receivable

The Company accounts for trade receivables at original invoice amount less an estimate made for doubtful receivables based on a review of all outstanding amounts on a monthly basis. Management determines the allowance for doubtful accounts by regularly evaluating individual customer receivables and considering a customer's financial condition, credit history and current economic conditions. The Company writes off trade receivables when they are deemed uncollectible. As of and for the year ended December 31, 2017, there were no allowances or write-offs recorded.

f) Foreign Currency Translation

The Company's functional and presentation currency is the U.S. dollar. Monetary assets and liabilities denominated in foreign currencies are translated into U.S. dollars at exchange rates prevailing at the reporting date. Non-monetary assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect at the transaction date. Revenue and expenses denominated in foreign currencies are translated at the exchange rate prevailing at the transaction date. Gains and losses resulting from the translation of foreign currencies are included in "Revenue - Foreign exchange gain (loss)" in the Statement of Operations.

DESJARDINS SECURITIES INTERNATIONAL INC.

Notes to the Financial Statements

December 31, 2017 and 2016

(stated in U.S. dollars)

g) Revenue Recognition

The Company's principal sources of revenue consist of brokerage commissions, research services, gains or losses on foreign translation and interest income.

The Company records its brokerage commissions on a trade date basis. The Company provides financial information, analysis and research to its clients. The Company recognizes its research revenues when they are earned, specifically when services are provided under the engagement terms, amounts can be determined, and collectability is reasonably assured. Foreign exchange gains or losses result from translation of transactions denominated in foreign currencies. Net interest revenue consists of interest earned on the Company's cash balances and short-term U.S. Treasury Bills. Interest revenue is recognized based on the effective interest rate method.

h) Deposit

The Company operates pursuant to Security and Exchange Act Rule 15c3-3(k)(2)(ii) as an introducing broker-dealer on a fully disclosed basis through its clearing firm, Pershing LLC. This organisation requires a clearing deposit of \$100,000.

i) Income Taxes

Current Income Tax

Current income tax assets and liabilities for the current year and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amounts are those that are enacted or substantively enacted at the reporting dates.

Deferred Tax

Deferred taxes are accounted for using the liability method. This method requires that deferred taxes reflect the expected deferred tax effect of all temporary differences at the reporting date between the carrying amounts of assets and liabilities for financial statement purposes and their tax bases. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Deferred tax assets are recognized when it is more likely than not that they will be realized.

j) Subsequent events

The Company has evaluated whether any events or transactions occurred subsequent to the date of the Financial Statements and through February 15, 2018 and determined that there were no material events or transactions that would require recognition in these Financial Statements.

3. Recent Accounting Pronouncements

Revenues from Contracts with Customers (Topic 606)

The FASB issued ASU No. 2014-09 which provides guidance on the recognition of revenue from customers arising from the transfers of promised goods or services. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps:

- Step 1: Identify the contract(s) with a customer.
- Step 2: Identify the performance obligations in the contract.
- Step 3: Determine the transaction price.
- Step 4: Allocate the transaction price to the performance obligations in the contract.
- Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

DESJARDINS SECURITIES INTERNATIONAL INC.

Notes to the Financial Statements

December 31, 2017 and 2016

(stated in U.S. dollars)

This ASU was amended by ASU No. 2015-14, ASU No. 2016-08, ASU No. 2016-10, ASU No. 2016-12 and ASU No. 2017-05 and is effective for annual periods beginning after December 15, 2017, and interim periods within annual reporting periods beginning after December 15, 2019, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients, or (ii) a retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). Earlier application is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period.

The Company has completed its evaluation of the impact on its financial statements. To transition to ASC 606, it will apply the retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption. The Company has concluded that the adoption of ASC 606 will not have a material impact on its financial position.

Statement of Cash Flows: Restricted Cash (ASU 2016-18)

The FASB issued Accounting Standards Update No. 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash, a consensus of the FASB's Emerging Issues Task Force (the "Task Force"). The new standard requires that the statement of cash flows explains the change during the period in the total of cash, cash equivalents and amounts generally described as restricted cash or restricted cash equivalents. Entities will also be required to reconcile such total to amounts on the balance sheet and disclose the nature of the restrictions.

ASU 2016-18 is effective for annual periods beginning after December 15, 2017 and within annual reporting periods beginning after December 15, 2017. The Company is currently evaluating the impact of the adoption of this ASU.

The Company's income tax expense recorded in the Statements of Operations differs from the amount that would be computed by applying the Canadian statutory tax rates as a result of the following:

	2017	2016

As of December 31, 2017, the Company has a net capital of \$6,228,200 (\$5,016,913 in 2016) which exceeds the required net capital of \$100,000 by \$6,128,200 (\$4,916,913 in 2016) (see Note 8 for the current year).

6. Related Party Transactions

The related party balances set forth in the table below result from transactions between the Company and the parent company and affiliates from Desjardins Group, in the normal course of business, as part of its operations. These transactions are measured at the exchange value which is the consideration established and agreed to by the related parties.

The transactions and balances with these entities are the following:

	2017	2016
Management fees (parent company) ⁽¹⁾	\$ 555,664	\$ 566,027
Cash (affiliates)	426,041	331,587

⁽¹⁾ Management fees consist of various services and facilities, as agreed upon in the expense sharing agreement.

DESJARDINS SECURITIES INTERNATIONAL INC.

Notes to the Financial Statements

December 31, 2017 and 2016

(stated in U.S. dollars)

7. Financial Risk Management

In the normal course of business, the Company purchases and sells for its clients a variety of financial instruments to earn commission revenue. Each agreement or contract exposes the Company to varying degrees of credit, liquidity and market risks.

a) Credit risk

Credit risk, principally, relates to the failure by a client to honour its contractual obligations or to an unfavourable market fluctuation that would prevent the Company from realizing its guarantees in full. This risk is managed in accordance with the credit policies established by management. Most of these transactions are standardized contracts executed in recognized markets and are subject to daily settlement of the various margins.

b) Liquidity risk

Liquidity risk is the risk that the Company cannot quickly convert its assets into cash in order to efficiently fulfill its financial obligations, particularly in order to fulfill the clients' requests for funds.

The following table presents financial liabilities by residual contractual terms to maturity:

Financial liability			Contractual term to maturity
	December 31, 2017	December 31, 2016	
To broker-dealers and counterparties	\$ 9,664	\$ 8,134	Due within one year
Accounts payable and accrued liabilities	57,445	49,999	Due within one year
To parent company and affiliates	77,026	143,718	On demand

c) Market risk

Market risk is the risk that the fair value of financial instruments will fluctuate because of changes in market prices. The Company is primarily exposed to foreign exchange risk.

Foreign exchange risk arises from the possibility that changes in foreign exchange rates could result in losses. The Company may enter into financial instruments consisting primarily of short-term investments and related party balances that may be denominated in foreign currencies. The Company has no involvement with derivative financial instruments used to reduce the foreign exchange risk.

In addition, earnings are subject to Canadian income taxes measured and paid in Canadian dollars. The Company translates its U.S. denominated Financial Statements into Canadian dollars for purposes of filing its Canadian tax returns. Given the changes in foreign exchange rates, this exposes the Company to significant fluctuations in the amount of taxes to be paid.
